

Specklinia mirifica Pridgeon & M.W.Chase,
nom. nov.

Replaced synonym: *Acostaea costaricensis*
Schltr., *Repert. Spec. Nov. Regni Veg., Beih.*
23: 28. 1923.

In the transfer of this species to *Specklinia*, the specific epithet *costaricensis* must be applied to its earlier usage in *Pleurothallis costaricensis* (see above), necessitating a new epithet here. The specific epithet is from the Latin *mirificus*, causing wonder, in reference to the sensitive labellum.
