

151. ANGRÆCŪM *bilobum*; caule brevissimo, foliis cuneato-obovatis oblique bilobis reticulatis racemo verrucoso pendulo multifloro multò brevioribus, sepalis petalisque lanceolatis patentibus, labello conformi paulò majore calcare filiformi emarginato brevioris.

A lovely Orchidaceous plant, with long drooping racemes of snow-white flowers, just tipped with pink, and slightly sweet-scented. It has singular, netted obovate leaves, cloven at the point, and slightly sprinkled with small tubercles. It was imported by Messrs. Loddiges from Cape Coast Castle.
