
NEW GARDEN PLANTS.

SACCOLABIUM MINIATUM.

S. miniatum; racemis brevibus erectis cylindræis, bracteis minimis acutis, sepalis petalisque ovatis acutis patulis, labello lineari obtuso recurvo calcare recto pendulo tereti breviorè, pollinibus albis.

A Java plant, imported by Messrs. Veitch, and flowered by both Mr. Rucker and Mr. C. B. Warner. It is not to be traced among Blume's species, and seems new. Its flowers, of a gay vermilion, or rich apricot colour, although somewhat small, have an extremely lively effect; they grow in upright racemes, about ten together. We have not seen the foliage.
