

14. ORNITHIDIUM RUBERRIMUM Rehb. fil. Huc: *Scaphyglottis ruberrima* Lindl. Pl. Lindl. 1846. p. 22. N. 113:

Foliis lineari oblongis obtusis oblique emarginatis, pedunculis unifloris bractea longioribus, sepalis ovatis acuminatis, petalis acutis, labello ovato recurvo obtuso undulato medio obsolete bilamellato.

An epiphyte with bright red flowers, from the forests near Merida, at the height of 5000'. July. (N. 667.)

Obs. Labellum non bilamellatum, sed callo ligulato instructum, cujus apex obtusus altius per labellum transgreditur. Illius margines tantum cl. Lindley vidit. Credo labello undulato ab insequenti diversum, licet valde affine.
