

44. HEXADESMIA *bicornis*.

H. bicornis ; caulibus fusiformibus elongatis, foliis linearibus obliquè bidentatis, floribus subsolitariis cernuis, labello ovato retuso subserrato, columnâ utrinque bicorni.

An addition to the insignificant genus *Hexadesmia*, sent to Mr. Loddiges from Columbia by Linden. It is very like *H. fasciculata*, but differs in the leaves and column.
