

4. HEXADESMĪA crurigēra.

(*Hexopia crurigera*, *Bateman mss.*)

H. crurigera; caule fusiformi, foliis exacte linearibus, racemis flexuosis paucifloris, bracteis ovatis membranaceis, mento valdè producto, labello obovato altè bilobo.

A small-flowered inconspicuous Epiphyte, of no beauty, introduced from Guatemala to Mr. Bateman, with whom it flowered some years since, when it received the name of *Hexopia*. Its flowers are not half the size of *H. fasciculata*.
