

Stellilabium lankesteri (Ames) Dressler, comb. nov. Basionym: *Telipogon lankesteri* Ames, Sched. Orch. 3: 23. 1923. TYPE: *C. H. Lankester 361* (holotype, AMES).

Unfortunately, the number of type specimens of *Stellilabium* is not much less than the total number of specimens available. Each, however, appears to be distinct and thus this new combination is needed.
