

**Stellilabium minutiflorum** (Krzl.) Garay, comb. nov.

Basionym: *Telipogon minutiflorus* Krzl. in Ann. Nat. Hist. Mus. Wien 33: 14. 1919.

Syn.: *Telipogon Lankesteri* Ames Sched. Orch. 3: 23. 1923.

*Stellilabium Helleri* L. O. Wms. in Brittonia 14: 443. 1962.

This rather rare Costa Rican species has recently been found in the  
**Dominican Republic:** by Rev. D. Dod, s.n. (NY).

This is also a new record for the West Indies. *Stellilabium Helleri* L. O. Wms., of which I also have studied the holotype, agrees in every respect with Kraenzlin's type material which I examined in Vienna. *Telipogon Lankesteri* Ames likewise, does not offer any criterion by which it could be kept separate from *S. minutiflorum* (Krzl.) Garay.
